

LIST OF IMPROVEMENTS FOR THE PERIOD: 10/2022 TO 03/2022

In view of the numerous improvements of the last 6 months, the list is now semi-annual so that the presentation is only on one page.

General improvement: Optimization of the display of large contents and bug fixes.

Batch activities

- General: Audio confirmation option for scan action.
- General: Scrolling on addition option (keeps the last scanned item on the screen).
- Discover feature (allows complete inventory: list present/absent/export csv).
- Borrow feature (shortcut to get the list of borrowed items of the member).

Databases : New fields

- Creation : book_conditions ; book_originality.
- Correction: No conversion from ISBN-13 to ISBN-10 if the prefix is 979.

Covers / Icon mode

- Improved processing of duplicate images. Reduction of memory consumption.

Documentation

- Archiving of publication notes from before December 2022.

Data on the Internet

- SRU: If Alternative ID empty; retrieve unimarc 003 as ark value.

Member Manager

- Definition of visible columns in member browser.
- Export of member history to a CSV file.

Borrowing / Returns management

- Limits on the maximum number of books reserved are applied.

User interface

- Detachable menu option.
- Keyboard shortcuts (Favorite SQL query).
- Set colors for SQL keywords.
- Display query completion time in the status bar of the main window.
- Define color for items.
- Display format of the publication date more open.

System launch interface

- Windows : biblioteq-darkmode.bat.

Searches

- Hypertext links with SQLite.
- Removal of hyphens from multi-volume ISBNs in the book search.
- Search in the main table.

SQL - Custom Queries

- Woody" feature.
- Allow UPDATE queries.
- Custom query menu in main interface.
