Tests & Results

Regression (0)

    Cache (0)

        valid since 3.16 (2)

For exploratory:

- Before updating to 3.15, the user has a mobile cache enabled and a Separate mobile cache is disabled while having another layer of cache, like Varnish, NGINX? (as per doc, we recommend disabling separate mobile cache)
- fresh install and update while htaccess isnot writable #
- APO is used, cache by device type is off , separate cache for mobile is off then update to 3.15 => separate mobile cache enabled and the notice about cache by device incompatibility displayed #
